

# DRAGON EYE NECKLACE & MAGNET INSTRUCTIONS

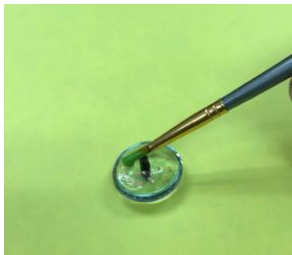

Wendy Rowe, Children's Librarian/Assistant Director, Barrington Public Library, Barrington, NH

Turn glass gem over to work on the back. Draw a vertical black slit in the middle with a black sharpie marker. Add dots or squiggly veins on each side of the pupil with a metallic sharpie.

Paint over the design with acrylic paint in a neat circle, and let dry thoroughly (at least an hour).

Glue either a magnet on the center of the back, or a necklace bail – line it up so it is going in the same direction as the black eye slit. Let dry thoroughly (overnight) before using as a magnet or necklace.
